An INVITATION

SPECIAL PRESENTATION of The Outstanding Chevrolet of Chevrolet History

EVERYONE is familiar with Chevrolet's brilliant record of past success, but the new Chevrolet represents the most spectacular of all its achievement . . . introducing a new conception of motor car value.

It is with pleasure, therefore, that we announce our ability to secure the services of a Chevrolet factory expert to conduct for us a special presentation of the Outstanding Chevrolet of Chevrolet History.

This presentation comprises a complete, thorough explanation of this sensational new car—and, in addition, a special series of illuminated slides and a motion picture of unusual interest entitled "With Chevrolet Across Canada."

Everyone is interested in the latest automobile developments! Everyone is cordially invited to attend! Make a note of the time and place.

Canada's Mineral Industry Test Alberta Coal

Primary Industries Of the

Dominions

Addressing the 30th annual meeting of the Canadian Institute of Mining and Metallurgy in Winnipeg, S. J. Cook, chief of the mining, metallurgical and chemical branch of the Dominion Bureau of Statistics, said that, "Canada's mineral industry, which is of increasing importance among the primary industries of the Dominion,

ings to the nation a prestige far beyond the monetary measure of the output. First in nickel, first in asbestos, third in gold, third in silver, third in lead and copper, and sixth in zinc, among the world's producers, Canada enjoys an enviable position in the industrial world with every prospect favorable to continued expansion."

The Oil For the Farmer.—A bottle of Dr. Thomas' Electric Oil in the farm house will save many a journey for the doctor. It is not only good for the children, but takes

ment. Copper, gold, silver, lead, zinc and other metallic products have been mined, and exceptional opportunities exist for the prospectors and mining company.

Motorist (after knocking over a butcher's boy): "Are you hurt, my Minard's Liniment prevents Flu.

Butcher's Boy (picking up contents of his basket): "Dunno, here's the liver and ribs, but where's the kidneys?"	Ten thousand bushels of Garne wheat are to be shipped to Britain and other wheat importing countries to be tried out by the millers there.

YOU CAN'T DYE

YOU CAN'T DYE
with Good Intentions

You can get results—after a fashion—with any old dye;

but to do work you are proud of takes real anilines. That's why we put them in Diamond Dyes. They contain from three to five times more than other dyes on the market! Cost more to make? Surely. But you get them for the same price as other dyes.

Next time you want to dye, try them. See how easy

it is to use them. Then compare the results. Note the absence of that re-dyed look; of streaking or spotting. See that they take none of the life out of the cloth. Observe how the colors keep their brilliance through wear and washing. Your dealer will refund your money if you don't agree Diamond Dyes are better dyes.

The white package of Diamond Dyes is the original "all-purpose" dye for any and every kind of material. It will dye *or tint* silk, wool, cotton, linen, rayon or any mixture of materials. The *blue package* is a special dye, for silk or wool only. With it you can dye your wool, silk or cotton, or a mixture of wool with results equal to

WHEAT POOL HISTORY GIVEN TO U. S. SENATORS

Washington.—Not only has the Canada Wheat Pool been of distinct advantage to the wheat farmers on Canada and tended to increase the prices they have obtained for their product, but it has had an influence on the whole wheat market, according to A. J. McPhail, president of the Central Selling Agency for the great three Western Canadian pools, who discussed the subject before the Senate committee on agriculture here.

Mr. McPhail came before the Senate committee by special request of the chairman, Senator McNary. Not only was he warmly thanked by Senators McNary and others of the committee for consenting to be present, but senators expressed the view that the information which he set forth as to the workings of the Canada Wheat Pool would be of great use in evolving plans in this country for farm relief.

Not the least interesting phase of the hearing was the suggestion that the country and Canada by co-operating with respect to the marketing of exportable wheat could control the world market to a still greater degree than it has already been influenced by the Canadian Pool.

Senator Brookhart of Iowa, asked a series of questions of Mr. McPhail on this point. When Mr. McPhail made no commitment on the policy of such co-operation, he indicated that the Canadian Wheat Pool, with some similar organization in this country, could have an increased influence on the world market.

Mr. McPhail gave a sketch of the history of the formation of the pools of Manitoba, Saskatchewan and Alberta, and their union in the formation of a central selling agency. Mr. McPhail declared that while the farmers of Western Canada in 1922 and earlier were not organized, the government continue the wheat board plan, it is now the general feeling of the farmers that the pool has been of the utmost benefit in the creation of a spirit of independence and self-reliance among them as well as increased knowledge of their own business. He declared the success of the pool had been a great incentive to the farmers in the movement in Canada.

"The farmer," he said, "is taking more interest in his own organization. There is a new individual sense of responsibility for the success of the organization." He said the pool now markets 22 to 24 per cent. of the wheat of the three provinces and carried on a continual campaign of education among farmers in order to increase the membership.

Members of the committee were interested to know how the pool is financed wholly by the banks and not by the government, and that borrowings sometimes reach \$65,000,000.

British Liberals Start Drive

Four Thousand Speakers Have Started on Election Tour

London England.—The great Liberal drive for victory in the general election has started and 4,000 speakers preaching Mr. Lloyd George's new unemployment removal scheme, will visit every nook and cranny in the country until every body knows it by heart.

As far as it is humanly possible every district will have at least one visit from one of the big guns who are planning to start at various points in England and Wales, and make lightning tours of the kingdom, covering on Scotland before the dissolving of Parliament.

Mr. Lloyd George, by the party leader, will open his tour in Wales.

Fellowship For Alberta

Cambridge, Mass.—Vernon Egan Way, of Edmonton, Alberta, has been awarded the Charles E. Young Fellowship in Greek studies for 1929-30. It was announced at Harvard University. Way is a student at the Harvard graduate school of arts and sciences. The fellowship is for a year's study at the United States school of classical studies at Athens.

Missing For Three Months

Boston.—The Boston Herald says that 17-year-old Rosamund Mearns daughter of Edward W. Morse, Jr., wealthy Brookline resident, has been strangely missing from home since the night of January 1. A nation-wide search by private detective and police has been unsuccessful.

W. N. W. 1730

Two Killed in Plane Accident

Pilot and Passenger Lose Lives in Crash at Rhedive, Sask.

Rhedive, Sask.—To the sudden panic of a passenger, unerved by the swooping ascent and gyrations of the aeroplane in which he had sought the thrill of a first flight, is attributed the tragic crash here that cost the lives of Flying Instructor Roland Ford, of Regina, and John Sychoduk, a C.P.R. section foreman. Trapped in the enclosed cockpit of a dual-control Velle Monocoupe when the right wing of the plane, in which the two were flying, foiled a telephone wire, they were plunged downward with terrific force, and death either came instantly from concussion, or else they perished in the flames that immediately enveloped the crumpled machine.

The coroner's jury which investigated the tragedy came to the merciful conclusion that the victims were either stunned or stunned and were thus oblivious to suffering. On the other hand, a Regina pilot who visited the scene and examined the wreckage of the plane, in the light of all the circumstances, expresses the opinion that the crash was not sufficiently sudden to cause the deaths of Ford and his passenger. He believes the two fought vainly to escape from the blazing cabin before succumbing to the flames.

Scholarships For Research Workers

Students Of Outstanding Merit Have Been Selected For Awards

Ottawa.—Sixty of the applicants for post-graduate scholarships from the national research council of Canada have been granted either fellowships or stipends for the year 1929 according to announcement made by the scholarships committee of the council. Out of the hundred applicants before the council, thirty of outstanding merit have been selected for the awards.

The council contains names throughout the breadth of the Dominion and allows for the expenditure of approximately \$25,000 for research which will be followed at various Canadian universities.

The purpose of the annual endowment of individuals with money grants by the national research council is to assist in building up in Canada a corps of scientific research workers capable of undertaking and directing research on Canadian industrial problems or in connection with the development of Canada's natural resources.

The scholarships go to university graduates who are following some line of scientific investigation at university laboratories.

Making Tour Of Canada

League Of Nations Office To Help In Membership Drive

Ottawa, Ont.—One of the highest officers of the League of Nations is a visitor in Canada. M. Joseph Avenol, Deputy Secretary General of the League, arrived in Vancouver from the Orient and will tour Canada from the Pacific to the Atlantic coast on behalf of world peace and the work accomplished by the League.

M. Avenol has been in China conferring with members of the Nationalist Government which has been formally recognized by the League as the de facto administration in that country. It is now a long time since Soviet Russia exercised any influence in the councils of Nationalist China and M. Avenol expects to report to Geneva a great strengthening of Chinese co-operation with the League as a result of his visit.

The Deputy Secretary-General will be a speaker on behalf of the big coast-to-coast drive for new membership in the League which is expected this will be well over 50,000 on the completion of the membership campaign.

Valued At Four Billion

New York, N.Y.—Diamonds owned in the United States are valued at \$4,000,000,000, the Congressional Insurance Company has found. The per capita value of the country's holdings is greater than that of any other country. Few of the world's large diamonds are owned in this country.

Will Operate New Hotel

Toronto.—The Canadian Pacific Railway has agreed to operate the hotel to be erected in Guelph by Arthur W. Cullen, Chicago grain operator, according to a statement made by the president of the railway, who is visiting Toronto.

CANADIANS IN U.S. ARE SUBJECT TO DEPORTATION

Washington.—Thousands of Canadians are certain to be affected by the "absolute deportation" law, which passed near the close of Congress. Walter W. Hubbard, assistant secretary of Labor, one time commissioner-general of Immigration, said the illegal residents are divided into three groups.

In the first group are those who entered this country without payment of the head tax of \$8 between 1917 when the tax was first imposed, and June, 1921, when the first immigration exclusion act went into effect. This group is the least seriously affected. They cannot be deported as the statute of limitations has outlawed their residence.

In the second group are those who entered without paying a head tax between June 3, 1921, and July 1, 1924, when the policy of strict exclusion went into effect. Members of this group also are in no danger of deportation, as the statute of limitations has operated to protect them from prosecution. But unless they take steps at once to validate their residence, they can never legally leave the country for a short visit to relatives in Canada. If they cross the international border they will be liable to arrest and deportation.

In the third group are those who entered this country since July 1, 1924, comprise the third group and are affected by "absolute deportation" law. They are not protected by any statute of limitations, as the 1924 law specifically provided that the statute of limitations does not apply. The government reserved the right in that law to proceed against illegal residents at any time, even 20 years hence.

Many in this group have obtained employment, have built homes, and to all intents and purposes are permanent residents. But if they are known to the immigration authorities they are in grave danger. If they are arrested, found to have evaded immigration laws, and sentenced to deportation, they can never hope to return to the United States.

When the session opened Premier Bracken and the leaders of the various groups paid tribute to the late Sir Hugh John Macdonald. By a standing vote, a resolution of sympathy was unanimously adopted.

Will Open Immigration Department in Regina

Permanent Headquarters To Be Established On May 1

Regina.—Permanent headquarters of the Department of Immigration for Southern Saskatchewan will be established here May 1, according to an announcement made by Geo. Todd, of the Immigration Department, who will be in charge of the new office.

Mr. Todd explained that there had been a growing need during the past year for an office in Regina, and that temporary headquarters had been secured in the Veterans Block during the last month. The new Regina office of the department will be situated in the Esplanade Block, and will be in a similar position to those already established at Saskatoon, Calgary and Edmonton.

Life And Death Costs Heavy

Toronto.—Taxation of the bill of costs, submitted by W. N. Tilley, K.C., counsel for the former Currie, commander of the Canadian Corps in France during the great war, is his latest action has been taken. The per cent allowed totaled \$5,377. The amount charged before taxation was \$11,087. In addition to this, defendants will have to pay judgment of \$500.

Prince Rupert For Duty

London England.—Prince George, youngest son of the King, reported to the foreign office that he had left for his duties in the morning in the future colleagues. The prince, who has abandoned his career in the royal navy, is attached to the western department at the foreign office. The prince returned to Buckingham Palace for luncheon.

DESIGNS IMPORTANT POST

Lord Lovat, who has now assumed over public life, has resigned from the chairmanship of the overseas settlement committee owing to ill-health. He resigned as parliamentary under-secretary for Dominion affairs last December.

Express Confidence In Bracken Government

Labour Resolution Defeated 31 to 19

Winnipeg.—By a vote of 31 to 19, confidence in the Bracken Government was expressed by the Manitoba legislature, when a Labor resolution demanding an investigation of the Seven Sisters Falls power agreement by a committee of the House was defeated.

The issue had been regarded by the premier as one of want of confidence. John Queen, Labor leader, was the sponsor of the resolution. In the division the government had the support of the Liberal members, including H. A. Robson, Liberal leader, Conservative, Independent and Labor members supported the Queen resolution.

When the session opened Premier Bracken and the leaders of the various groups paid tribute to the late Sir Hugh John Macdonald. By a standing vote, a resolution of sympathy was unanimously adopted.

Will Open Immigration Department in Regina

Permanent Headquarters To Be Established On May 1

Regina.—Permanent headquarters of the Department of Immigration for Southern Saskatchewan will be established here May 1, according to an announcement made by Geo. Todd, of the Immigration Department, who will be in charge of the new office.

Mr. Todd explained that there had been a growing need during the past year for an office in Regina, and that temporary headquarters had been secured in the Veterans Block during the last month. The new Regina office of the department will be situated in the Esplanade Block, and will be in a similar position to those already established at Saskatoon, Calgary and Edmonton.

Serious Epidemic Of Meningitis In China

Steamship Officials Take Steps To Prevent Spread Of Disease To Other Countries

Shanghai, China.—The meningitis epidemic having reached serious proportions here officials of steamship lines have decided not to accept United States coast guard vessels bound for Canada and the United States. The action was taken in an attempt to prevent the possible spread of disease to these countries.

Owing to lack of statistics accurate information of the number of cases was lacking but it was known to be large. In the Shanghai area authorities estimated, there were one thousand cases being treated. Many deaths have occurred within a radius of one hundred miles of Shanghai.

Michigan Law Repealed

Famous Life - For a - Pint Law Repealed

Lansing, Mich.—Michigan has repealed its famous "life-for-a-pint" law. Governor Fred W. Green signed the Watson House bill eliminating 120 "minor" felonies from the list of criminal offenses.

Governor Green said he would have no more life sentences. Mrs. Ella Mae Miller, Charlie Tripp, Tony Papich and others who are serving life sentences for liquor felonies.

SUBSIDY SYSTEM FOR PROVINCES IS CONDEMNED

Ottawa.—Manitoba would not have been out better off today had she retained all her natural resources from the time she was a province, declared A. R. McMaster, Minister of the Interior.

Manitoba's natural resources commission and water board, were brought here to determine whether they might aid in the solution of a tragic ocean mystery, either during the Dole flight to Honolulu or army and navy for alleged land.

"Her natural resources," he said, "were not properly managed, and, as a result, are now being returned to the sea. These alienated are more than offset by the Dominion's expenditure in their administration since 1871. What Canada has done for Manitoba has more than compensated for any possible loss."

While admitting that to follow the order-in-council of the Federal cabinet, Manitoba must be placed in a position of equality with other provinces, he must not be discriminated against, Mr. McMaster urged that "the Dominion must not be placed in a worse position than she would have been in had Manitoba kept her natural resources from the first and administered them herself."

The subsidy system, he declared, was a failure. He urged that the commission be charged in increasing such payments. It was his principle for one government to collect taxes and another to use them for revenue. The practice should be kept in as narrow confines as possible, curtailed so far as was practicable, in justice to all.

"Manitoba is not a poor state," he continued. "If she is treated with justice there will be demands for similar treatment from east and west. One claim will lead to another. It will become a vicious circle, and a real danger here—an endless ring of demands upon the Federal Government."

One of two things would be the result of such a situation. Either Dominion services would have to be curtailed or else taxation would be increased. The one avenue open to the Government of Canada to increase revenue was through its customs duty, he believed. And that was what he would touch the pocket of the consumer.

Mr. Justice Turgon, chairman of the commission, asked Mr. McMaster what he would suggest in place of subsidies which he was condemning. Mr. McMaster replied that he would rather see a lump sum paid to Manitoba, if compensation were necessary, than have an increase in allowances. But that was his opinion, he added. He had no instructions to offer any such suggestion.

Mr. Justice Turgon pointed out that the subsidy system was provided for in the Confederation pact and was meant to take the place of surrendered avenues of revenue through customs duty.

CANADA TAKES ACTION IN THE T. ALONE CASE

Ottawa.—The sinking of the Canadian schooner "T. Alone," by United States coast guard vessels, has been the subject of formal representations by the government of Canada to the United States.

This was stated in the House of Commons by Right Hon. W. L. Mackenzie King, prime minister, in answer to a question by Hon. R. B. Bennett, Opposition leader.

Mr. King stated that the "T. Alone" case had been the subject of correspondence between Ottawa and Washington for the past week. He also said that the correspondence in this case would be brought down in due course.

Washington.—Word from Ottawa that the Canadian Government had decided to make the sinking of the Canadian run-ship "T. Alone" subject of formal representation to the American government was interpreted by official and diplomatic circles here as a move on the part of the Canadian government to bring the anti-rumming treaty up for formal discussion.

There has been an influx on during the past few days in some quarters in Washington to believe that the Canadian might drop the case, since a move to strengthen the treaty or steps to straighten out the tangle were made by the American authorities.

It is generally believed the Canadians are more interested in the principles of the case with regard to the right of search than they are with the actual sinking.

Pacific Yields Clue To Aviation Tragedy

Parts Of Airplane Found May Solve Ocean Mystery

San Francisco, Calif.—Parts of an aeroplane, twisted into weird shapes and water-soaked, were brought here to determine whether they might aid in the solution of a tragic ocean mystery, either during the Dole flight to Honolulu or army and navy for alleged land.

Most of the evidence indicated that the plane was from the government craft which disappeared in 1922 or 1923 during a night off the Pacific coast. The wreckage, said after a brief examination.

There were also some indications that the hardly distinguishable struts, rudder and frame might be parts of the plane which was carried by William P. Erwin, American aviator, and Alvin E. Schindler were carried to their death when 500 miles from here on their way to Honolulu in 1927.

New Counts Added In Auto Offences

R.C. Juries Have Alternative In Manslaughter Indictments

Vancouver.—The alternative counts of causing grievous bodily harm and of furious driving so as to cause bodily harm have been added by the attorney-general of British Columbia to manslaughter indictments in auto cases. This was explained at the present sittings by Mr. Justice F. B. Gregory in presenting manslaughter indictments in auto cases. The addition follows a recent decision of the supreme court of Canada.

Mr. Justice Gregory said the juries are loath to find an accused guilty of manslaughter because they think it savors of moral turpitude. Mr. Justice Gregory said the counts can now act on the lesser counts."

Truquavien Flies Safe

Bogota, Colombia.—Two weary aviators for whom all hope had been abandoned have turned up at Tumaco, southern port of Colombia, after a two days' voyage in a small boat along the coast of Ecuador and Colombia. The Truquavien fliers declared they had been driven ashore in Northern Ecuador, where their plane had been destroyed.

Aviation Course By Mail

Boston.—Learning to fly, by mail, is now possible under a plan being carried out by the Massachusetts State Department of Education. Since the department's recent announcement that it would offer a correspondence course in aviation, more than 400 inquiries have been received from 23 states of the union, Canada and Haiti.

Will Bring Britishers Here

Movement of 2,200 People From Britain Under New Arrangement

Referring to the cable dispatch from London, reporting the completion of arrangements between the Overseas settlement office and the Canadian railways for a movement of 2,200 Britishers, the Department of Immigration explained the situation in a statement recently issued. The arrangement referred to was made between the Overseas Settlement Department of the British Government and the Canadian Department of Immigration and the official announcement concerning it was made three weeks ago.

The plan is that the Canadian Pacific Railway Company and the Hudson's Bay Company have each guaranteed to place 1,000 single Britishers in farm employment and the Hudson's Bay Company has assumed a similar obligation for 200. The selection of men who will come under this arrangement lies entirely in the hands of the Canadian Department of Immigration and no man who is not now employed will be included if his unemployment is due to any fault of his own.

Included in the 2,200 will be experienced farm workers and others without experience. The larger part of these will be drawn from areas affected by unemployment in the mining industry, but the men will not all be unemployed. Canadian immigration officials have been wary against the inclusion of hawkeyes who came to Canada last autumn, made no real effort to work and had to be helped home. The same warning is made applicable against all others of a similar type.

Interest Is Proprietary

Prince Of Wales Is At Home When In Canada

The Prince of Wales has expressed the hope that he can visit Canada again before long, though it is added that he will not be able to come this year. The King's covetousness no doubt precludes any prolonged absence of the heir apparent upon whom now devolve many functions usually performed by the Majesty. When the Prince does so, at the time, he will be welcomed by every class of the population in Canada everywhere for that he belongs to them as much as to the heart of the Empire. That have proprietary interest in His Royal Highness.

And the Prince in turn has a proprietary interest in this part of the Empire. In addition to being its future King, he boasts a home of his own to come to when he arrives. Ottawa Journal.

Admired His Manners

Down dropped the polo-mann, and immediately the traffic stream was in motion, one car shooting out in front of the other with a crash. At that moment a pretty girl made indiscreet dash for an island in the centre of the roadway.

She would have been knocked down by the swiftly-moving car had not the driver jammed on the brakes. "Women and drivers are always in the way," he shrieked furiously. "Glad to see you have the manners to put yourself last," retorted the girl coolly.

"Oh, look, Peter! Here's a picture of a vineyard and a lot of people treading the grapes—I wonder why they do that?"

"I asked dad, and he said it was to put the kick in the wine."

"Tad—Pa, what's a matrimonial bureau?"

"Dad—It's a bureau, son, with drawers packed full of women's figns and one man's necktie."

Drunk men, who have been propped up against a lamp-post, to a passer-by—"If you don't take this thing out of my arm I shall drop it."

A recent report of the Geographic Board of Canada states that the Albany river, rising in lake St. Joseph and flowing into James Bay, Ontario, was named by the Hudson's Bay Company, in 1685, after James, Duke of York and Albany (1633-1701), later King James II.

The young apprentice was whistling merrily.

"Hey, that!" shouted the foreman. "You mustn't whistle while you work."

"Who's working?" queried the apprentice.

"Both lemons and oranges give more juice if heated before squeezing."

Artificial Incubation

Eggs Must Receive Great Care In Order To Secure Successful Hatch

Whether one is using the broody hen or the incubator it is a matter of importance that the eggs be produced by good healthy breeding stock. The care the eggs receive has also much to do with the success of the hatch. Mr. F. C. Zifford, Dominion Poultry Husbandman, in Circular No. 71, entitled "Artificial Incubation," points out that the fresher the egg the better the chance of a good hatch. Following broody hens to sit on the eggs before they are gathered is a matter of great importance, nor should the eggs be allowed to become chilled. If the eggs are to be kept several days before incubation, it is recommended that they be kept in a covered container and not in an open basket which allows too much evaporation. For best results the eggs should be kept in fairly even temperature of from fifty to sixty degrees. It is important to select only one egg per egg capacity, eggs that are extra long, unusually short, or rough or thin in the shell as well as eggs that are cracked or yolked should be used for other purposes than hatching. Rough handling is also a cause of disappointment particularly at the beginning of the incubation period when jarring may kill many germs in the eggs. The singular lesson of the Department of Agriculture is that the incubator is well ventilated cellar with a fairly even temperature for the location of the incubator. Fresh air is necessary, it is pointed out, but in admitting it draughts should be carefully avoided. For home hatching with an ordinary size farm flock of 50 egg capacity machine is recommended because it is more convenient than a larger machine to handle.

Spring's Sweetness

Sup Now Running In The Maple Trees In Eastern Canada

With the approach of spring in Eastern Canada, the sap is running in the maple trees. Last year the quantity of maple syrup produced in Canada was valued at \$5,584,588. Of this total \$7,700,000 worth of sugar was valued at \$2,269,686, and 1,686,363 gallons of maple syrup at \$2,314,902. The province of Quebec is the chief source of maple syrup in Ontario, the next largest producer. Nova Scotia and New Brunswick account for comparatively small quantities of each product.

There has been a great improvement in recent years in the process of sugar making. The replacing of the open sap buckets and the old sugar kettle by the modern covered kettles and rapid moving evaporators has raised the quality both of the syrup and sugar.

When the sap is in the maples, there is the time in some parts of Quebec and Ontario for sugaring parties. These are usually largely attended by young people, both sexes, and are the scenes of much wholesome gaiety and fun.

Heavy Tourist Traffic

In 1928 all records for tourist travel in Canada were broken. Figures compiled by the Department of National Revenue, from returns made by ports and airports throughout the Dominion, show that 2,698,757 foreign automobiles entered Canada for a period not exceeding 24 hours; 945,945 entered for a period not exceeding 60 days; 1,173 entered for a period exceeding 60 days and not more than six months. During the year 91,871 Canadian automobiles were exported for touring purposes.

Canada's Coal Deposits

Canada, with one-third of the world's coal deposits, should be able to dominate the markets of the Western Hemisphere, in the opinion of Sir Arthur Danks, head of the British Mission to Australia on Empire Trade, who passed through Vancouver eastward-bound the other day.

Albany River

A recent report of the Geographic Board of Canada states that the Albany river, rising in lake St. Joseph and flowing into James Bay, Ontario, was named by the Hudson's Bay Company, in 1685, after James, Duke of York and Albany (1633-1701), later King James II.

The young apprentice was whistling merrily.

"Hey, that!" shouted the foreman. "You mustn't whistle while you work."

"Who's working?" queried the apprentice.

"Both lemons and oranges give more juice if heated before squeezing."

MEET INSTANT DEATH

Charles R. Traub, Pathé news cameraman, was instantly killed while the White "Triple" racing car, driven by Lee Bibbe, also killed in an attempt to break Segrave's record at Daytona Beach, Fla., skidded at 202 miles an hour and crashed into him while he was operating his camera.

Canada's National Parks

New Points Of Scenic Beauty Being Opened To Visitors

In Canada's 11,000 square miles of national parks steady progress is being made in opening new and outstanding points of scenic beauty to the pleasure and the tourist. Engineering and construction work carried on during 1928 by the national parks branch of the Department of the Interior, as we learn from its annual report, greatly increased the facilities for the comfort and enjoyment of visitors, and preparation for the coming season's tourist flow are now well advanced. The motor roads in the national playgrounds in the western provinces were extended, maintenance and improvement work carried out, so that there are now slightly over 400 miles of first class highways in the parks.

Playwright—You received my play, of course. Will you produce it?"

Producer—Why, yes. Here (to office boy) dig down in the wicker basket and produce Mr. McKay's play for him.

"I hear of Fred's got a job as a last him seven years."

"Who said so?"

"The Judge."

Alberta Sheep

Foothill Forest Reserves Used For Summer Sheep Pasture

Farmers who raise sheep on the foothill lands in Alberta find no difficulty in securing an abundance of winter forage, but it has not been easy to find adequate pasturage for the summer months. Suitable sheep pasture and an abundance of it is available in the forest reserves in the foothills of the Rockies. This area, however, is too far away for trailing the sheep from the Lethbridge district, but from a number of years' experience the Lethbridge Experimental Station has found it profitable to ship sheep by rail to and from the foothills. The results of eight seasons' work have shown the plan to be both practical and profitable. The superintendent of the Lethbridge Station, in his report for 1927, published by the Department of Agriculture, at Ottawa, states that during the fall and winter months the sheep were pastured on suitable fields or ridges at the station. During the summer months they were pastured in the Crown's Nest Forest Reserve and returned by rail again in the fall. The hanks came early, commencing about the middle of March, so that they were sufficiently developed to stand the journey to the pasture ground when the shipping time arrived. In a financial statement for the year ending October, 1927, the flock showed a gross profit of \$1,000.

Canada's Historic Sites

Visible Evidence Of Our History Shown In Ruins

Canada's historical background contains some of the most romantic and interesting episodes in the history of North America. In many districts throughout the Dominion there still remains visible evidence of our history, which has been preserved; but there are scenes of other and often important actions and events which are unmarked by any special reminder of what transpired at these points. The Department of the Interior has been carrying on a systematic survey of the ruins of old forts, storing the ruins and suitably marking the sites of national historical importance.

She: "So you've seen me on the stage? What was I in at the time?"

He: "Three Rehearsals, a variety of heads."

Charles Dickens wrote a "Life of Christ" especially for his children.

MAKE EPIC TREK

Arthur W. North, of the Explorers' Club, New York, and his fourteen-year-old son, Robert, photographed outside the Canadian National Railway station at Winnipeg, on their return to civilization after a snowshoe tramp of eight hundred miles from Hudson, Ontario through the winter wilderness of Northern Ontario and Manitoba. Studying the primitive Indian trails in a country that has seldom been visited by white men, the explorers spent more than two months in the open and accomplished a feat that has never been equaled. From the Canadian National line at Hudson they struck out by way of Lac Seul, Womak Lake and half a dozen other lakes and Nelson River to York Factory on Hudson Bay. Turning homeward, they reached the steel of the Hudson Bay Railway at Amery, and again the Hudson Bay line at York Factory.

The Cold Frame

Plant Grown Greatly Advanced By Use Of Cold Frame In Early Spring

Gardeners who grow annual flowers and lettuce can advance their plants by using a cold frame for starting the seed. The cold frame consists of a bottomless box with a sash of glass for a cover. A cold frame is of very simple construction; indeed boards nailed together to the dimensions of the sash to be used answer very well. It should be made higher at the back than at the front in order that the top may have a slope towards the earth to receive the sun and to shed rain. The construction and handling of a cold frame is described in Circular No. 63, of the Department of Agriculture, at Ottawa, and issued by the Publications Branch. When the frost is out of the ground but the soil is still too cold and wet to plant, the frame may be set on the soil which should be well worked up with a fork or spade. The frame should be well banked on the outside and the glass sash fitted on and left in that position for several days in order that the sun may warm up the soil. Cotton attached to a frame is sometimes used instead of the glass for the cover, with fairly satisfactory results unless frosty nights occur, when allowance must be made for the cold. The plants and soil to chill during the night. The seed of annuals, even biennials and perennials, that are desired to grow should be sown in rows about four inches apart, and about the usual depth. When the young plants come up the frame should be kept sufficiently aired by raising the back of the sash and venting the plants from getting spoiled when they are apt to fall over and rot. When venting when the wind is high, as cold wind blowing directly on the plants will injure them. By raising the sash a little and allowing the wind to blow over the plants, the hand inside, one may readily determine whether or not ventilation is necessary. The glass should be fitted on and left in that position for several days in order that the sun may warm up the soil. Cotton attached to a frame is sometimes used instead of the glass for the cover, with fairly satisfactory results unless frosty nights occur, when allowance must be made for the cold. Cotton attached to a frame is sometimes used instead of the glass for the cover, with fairly satisfactory results unless frosty nights occur, when allowance must be made for the cold. The plants and soil to chill during the night. The seed of annuals, even biennials and perennials, that are desired to grow should be sown in rows about four inches apart, and about the usual depth. When the young plants come up the frame should be kept sufficiently aired by raising the back of the sash and venting the plants from getting spoiled when they are apt to fall over and rot. When venting when the wind is high, as cold wind blowing directly on the plants will injure them. By raising the sash a little and allowing the wind to blow over the plants, the hand inside, one may readily determine whether or not ventilation is necessary. The glass should be fitted on and left in that position for several days in order that the sun may warm up the soil. Cotton attached to a frame is sometimes used instead of the glass for the cover, with fairly satisfactory results unless frosty nights occur, when allowance must be made for the cold. A Clean Up Week

Two weeks ago this paper reminded its readers of the desirability of a general spring clean-up. Almost coincident with the resumption of the weather turned colder and snow has since fallen, making such a campaign unpracticable at the present time.

There is a general movement to establish the last week in April, "Clean Up Week in the West". This is a desirable move and should be supported by all citizens. Inaugurated by some responsible body, such as the village council, the "clean-up" would be given the necessary impetus to insure its success.

In the past Oyen has enjoyed an enviable reputation for its cleanliness and neat appearance. But no town is so clean or neat that it could not be improved upon.

Do your part in improving the appearance of your town.

Young Orators Enter Final Contest

Gwen Gant, age 17, of Grande Prairie and Walter MacDonald, age 18, of Red Deer were selected as the winners for Northern Alberta and Southern Alberta respectively in the finals of the Alberta division of the Canadian and International Oratorical contest on Thursday night. These two winners will later contend for the privilege of representing Alberta in the Dominion finals to be held at Toronto, following which the Canadian champion will compete for International honours at Washington.

Baby Beef Brings Record Price

A record price was established at the Calgary Spring Show during the past week when the first prize calf in the Boys' and Girls' Calf Feeding competition sold for three dollars a pound. This calf, an Aberdeen Angus, shown by Harold Richardson of Bowden, was an outstanding winner in its class. It was purchased by Mrs. Hind of Hinds Meat Market, Calgary, and at a weight of 910 pounds, brought its young owner the handsome return of \$2,820.

Paint Value!

The Cheapest Paint is the Paint That Protects Longest!

A paint that will protect the surface for years, invariably makes a beautiful finish, and these two important qualities are found only in paint that is absolutely pure. It must have good body, built up of 100 per cent pure ingredients throughout.

The paints we sell have grown in popular favor because many satisfied customers know, they are the cheapest paints they can buy.

Ask to see our beautiful color cards.

Motor Cars

The Model 6-80 is offered in four attractive body types, including Sedan, Sport Sedan, Cabriolet and Victoria.

Special attention has been paid to roominess and comfort in every body model and the long wheelbase of 120 inches, with long chassis springs and hydraulic shock absorbers insures riding comfort over any road conditions far superior to any other car within hundreds of dollars of its price.

Price range: \$1675.00 to \$1795.00 f.o.b. Oyen

Howard Wade - Oyen

He chose it for its big car prestige

ASTONISHING how many people who formerly paid high prices for the privilege of big car ownership are now turning to Pontiac. But it's not at all surprising when you consider Pontiac as the Big Six it is... instead of the low-price class in which its cost places it.

It's a car you can refer to with a sense of pride... a car that will more than justify your confidence in its prowess. Just see it and drive it if you'd learn why experienced and exacting motorists choose Pontiac for the Big Six prestige it provides.

About Town and Country

The District Builders Night, scheduled for last Friday, and postponed on account of the snow storm, will be held next Friday. A picture show will commence at Oyen Theatre at 5 p.m. and be run for two complete showings. This will be followed by a grand dance. Town residents are asked to attend the first showing so that there will be ample accommodation for visitors from the country at the second show.

Born—To Mr. and Mrs. Russell Black of Helmsdale, on Thursday April 4, a daughter.

Born—To Mr. and Mrs. Floyd Horne of Capton, at Oyen Hospital on Sunday, April 7, a daughter.

Mr. H. E. King of Saskatoon, was a business visitor in Oyen during the latter part of last week.

Mr. Albert Bown of Exel, who has been spending the winter months in the old country and the continent, returned to Oyen last Saturday.

Used Cars For Sale—One Chrysler four-door sedan, good shape, new tires, \$675.00. One 1926 Chevrolet Coupe, in good shape with new tires, \$140.00. One 1928 Oldsmobile Coach, A-1 condition, good value, \$850.00. Look these over at Johnson's Garage.

Considerable interest is being shown in the new model L 1929 Case tractor, which is on display in the Case showroom, on Main Street.

A general round-up of car owners driving without licenses was held in Sibbald district at the end of last month, produced 8 cases. Fines were imposed in each case and the owners ordered to procure licenses at once.

Miss Dorothy Fisher of Calgary, is in Oyen to attend the wedding of Miss Edith Balaban.

Miss Bella Lees, left for Calgary last Sunday to resume studies at normal.

British Boys Arrive For Farm Training

The first group of British boys, forty in number, coming to Alberta during the present season under the arrangement between the Provincial Government and the Overseas Settlement Board arrived in the province during the past week. They have been equally divided between the schools of agriculture at Vermilion and Olds where they are being given a month's practical training in methods which will fit them for work on farms in the province. At the conclusion of their month's course another similar group is expected to arrive and following this two groups of British young women will come forward at intervals of a month for courses of training in practical home economics before being placed as domestic farm help.

OBITUARY

Thomas Ford

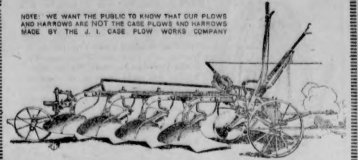

The death of Mr. Thomas Ford, one of the early settlers of this district, occurred at his home in Aeadia Valley last Sunday, April 7, 1929.

A funeral service was held at his home today at noon. Rev. F. S. Smith of All Saints Church officiating. Following the service, the cortege left for Oyen, where it was joined at All Saints Church by members of Oyen Lodge No. 104, A.F. & A.M. and visiting brethren, and afterwards proceeded to Oyen Cemetery. Here, after the religious service of the church had been delivered by Rev. Smith, a Masonic Service for the departed brother followed. Wor. Bro. O. F. Kirkpatrick, officiating.

The late Mr. Thomas Ford, who died in his eighty-seventh year, was born in Lancashire, England. He came to Canada as a young man, and resided in Ontario for over fifty years, coming to this district in 1913.
